May 2022 - now / Independent Consulting

Mar 2021 - Feb 2023 / Senior Software Engineer at Coperniq.io (YC backed, San Diego, California), Remote

In a fast-paced startup, I have been engaged in the entire development circle starting from product/design negotiations, task management, and team sync. Being the gate for PR to the codebase. AWS CI/CD orchestration chores.
Under my control, the project has been blown up from MVP to a well-operated complex solution with a dozen clients pushed through breakeven.

Nov 2018 - Sep 2020 / Lead Front-end Developer at Sberbank, https://domclick.ru/, Moscow, Remote

Led development circle of the company's UI system for acquiring real estate from property search to mortgage registration. More than 60 well-tested, documented packages.
Interdepartmental interaction, the requirements, and API negotiation, design guide
Had a well-received talk at React Russia 2019 Conference

Mar 2018 - Nov 2018 / Freelance Front-end Developer

Implemented student-facing web UI of a classes scheduling system for Wharton University, PA, with React.js/Redux
Customized mobile-first app for the loyalty program of Suncorp, AU
Designed UI/UX prototype terminal for a crypto-trading system

Feb 2016 - Feb 2018 / Front-end Developer at [Mail.Ru Group](#), https://youla.ru (the second biggest classified in Russia), Moscow

Designed and built modular, testable web UI for classified SPA (24M MAU)

Extracted standard components and their tests (Jest/Enzyme) to NPM packages with a specific build process to unify several integration teams' development processes.
Implemented an instant messaging app on top of WebSockets to facilitate fast platform user communication
Interviewed and daily mentored new team members
Facilitated internal education and knowledge sharing to ensure high productivity of colleagues
Participated in discussions with API engineers on software contracts to mitigate risks and enable parallel development of two isolated system parts.
The project's team was awarded The Best Team of the year.

Apr 2015 - Feb 2016 / Front-end developer at round.me, Moscow

Made a custom build of the KRPano viewer tool to show 360 photo panoramas directly in the FB feed.
Introduced webpack pipelines to the legacy app to reduce maintenance costs.

Jun 2014 - Feb 2015 / Front-end developer at morepower.ru, Saint-Petersburg

Created from scratch Marionette.js web application.
Formalized user stories in close collaboration with PM and designer and translated them into tasks for backend engineers.
Coordinated remote team members daily.

Nov 2013 - Jun 2014 / Junior Javascript Developer at anywayanyday.com, Moscow

Delivered credit card purchase processing front-end logic
Supported and maintained existing jQuery app
Contributed to API development by implementing web handlers using Razor templates
Learned some best practices on application debugging and dependency injection
Designed and implemented a cache layer for saving UI state in the local storage

Education:

Yandex Interface Development School 2013 (Yandex) kicked off my career with NASDAQ:

YNDX on-site education program. Only 3% passed the entrance exam.

Algorithmic toolbox by Coursera 2018 (coursera.com)
